TWA and STEL Alarm Viewer for G450 & G460 Gas Detectors

1. Download the zip file and extract it to a known location on your hard drive by clicking on the file name and saving it. Make a note of the location where it is saved.

2. Next, extract all files from the zip file to an empty folder on your computer hard drive, including any sub-folders. This will give you the software necessary to view the TWA and STEL information using your internet browser.
   Note: *It works best with Firefox and Chrome internet browsers.*

Document Type:	Zipped Folder
Version:	4395
Release Date:	05/04/15
File Size:	.5 MB

To Use the Data Logger:

1. Using the current GfG data download software, download the data from your G450 or G460.
   Note: *The datalogging Interval must be set to 1 minute.*

2. Save the file by selecting "Save As", and save the file as "type" .txt, *not* as the .gdf default setting.

3. Now open the folder containing the software from the website that you saved, and double click on "DDS_v4395". Your browser should open with the GfG logo.

4. Click on the "browse" button, and select the data file you downloaded (it must be a .txt file).

5. Use the navigation buttons on the top and bottom of the viewer to view alarm levels, gas values, sensor graphs, etc...
