TS400 Certificate & Report Generators

With the latest release of the DS400 configuration and download software, improvements have been made to the Certificate & Report Generator software.

The newest software has been included on the installation CD ROM for the TS400 since August 2013.

Below are the latest software programs. They should be extracted to the original installation folder for the DS400 software.

Usually that folder is C:\Program Files\GfG\DS400.

Note: *Administrative log-in may be required.*
